

SATURDAY

8:00	<i>Registration + Coffee</i>	
8:30	<i>Welcome</i>	
	<i>Session 1</i>	
9:00	Rebecca Olsen	The effects of semantic, episodic, future, and past thinking on delay discounting rate
9:15	Rebecca Ryan (Bodeker)	Effects of acute and chronic methamphetamine on choice in delay and probability discounting
9:30	Mary Beth Neff	The effect of should versus would decisions and question order on delay discounting of reinforcers for self and others
9:45	<i>Morning Tea</i>	
	<i>Session 2</i>	
10:15	Brett Furlonger	Broadening the base of applied behaviour analysis to solve real-life relationship problems
10:30	Jessica McCormack	The effect of differential outcomes pre-training on tact acquisition
10:45	Jayden Ward & Esther Syred	Applications of ABA in the clinical population going beyond children with autism
11:00	<i>Coffee Break</i>	
	<i>Session 3</i>	
11:15	Michael Davison	Replication: What is it good for?
11:30	Doug Elliffe	Why we should use rank-permutation testing for behavioural data
11:45	Randolph Grace	On the origins of 'computationally complex' behaviour: Evidence from an artificial algebra
12:00	<i>Lunch + Posters + Business Meeting at 1:00</i>	
	<i>Session 4</i>	
1:30	Queenie Leung	Using a stimulus equivalence protocol to teach concepts of single-subjects designs
1:45	Michelle Holtzhausen	Why choose between "train-and-place" or "place-and-train" when you can do both? Using simulated setting training to enhance job-site training of individuals with intellectual disability
2:00	Rhian Collings	Behavioural Skills Training package: Teaching teachers to implement the IISCA
2:15	Bradley Drysdale	Using eye-tracking to explore gaze behaviour of primary school children to text: How do they locate relevant information?
2:30	Stephen Provost	Discriminating good from bad writing: electrophysiological and behavioural correlates
2:45	<i>Coffee Break</i>	
	<i>Session 5</i>	
3:00	Shanna Garland Duignan	Investigation into slot machine information displays
3:15	Rana Asgarova	Gain-loss asymmetry in local effects of reinforcers in humans
3:30	Stephanie Gomes-Ng	Control by past experience and external stimuli in uncertain environments
3:45	Stuart McGill	Left-Left-Right-Right: The effect of conditional probability on choice preference and reinforcer-evoked potentials
4:00	<i>Coffee Break</i>	
	<i>Session 6</i>	
4:15	Darren Baharrizki	Choice under stimulus control
4:30	Xiaosha Meng	Influences of graphical image pairing on product preference
4:45	Tina McAdie	Food preferences of a captive wombat population
6:00	<i>Conference Dinner – Mexican Café</i>	

SUNDAY

8:30	<i>Registration + Coffee</i>	
	<i>Session 7</i>	
9:00	John Y. H. Bai	Stimulus-reinforcer relations and the role of generalisation
9:15	Kate Stuart	Learning of perceptual relationships with implicit or explicit instructions and feedback
9:30	Alejandro Macías Ayala	Delayed information and suboptimal choice
9:45	Peter B. C. Kim	The past haunts us – but when, how, and why?
10:00	<i>Morning Tea</i>	
	<i>Session 8</i>	
10:15	Winnie Chiu, Margaret Gertzog, Ebonee Hodder, Chloe Jones, Danielle Walden, Angela Arnold-Saritepe	Behaviour analysis in practice – The role of social validity
10:45	Anastasia Sawchak	Teaching extended communication sequences to children with developmental disabilities
11:00	Neville Blampied	“Faking good” or real improvement following behavioural treatment of pediatric sleep disturbance (PSD)?
11:15	<i>Coffee Break</i>	
	<i>Session 9</i>	
11:30	Barry Parsonson	Personal recollections on the early days of ABA in New Zealand
11:45	Megan Borlase	Comparison of reinforcer assessments with individuals with Autism Spectrum Disorders
12:00	Angela Arnold-Saritepe	Functional assessment of caregiver non adherence to behaviour plans
12:15	<i>Prizegiving + Farewell</i>	
12:30	<i>Lunch + Posters</i>	

POSTERS

Zoe Walsh	Thinking about our past does not impact self-control
Lydia Chapman	Smoke alarm tampering in student accommodation: A behavioural intervention
Fengshan Li	Improving mental wellbeing among university students via a smartphone application based on Acceptance and Commitment Therapy
Jessica McCormack	Derived relations between complex shapes using the differential outcomes procedure
Megan Borlase	The triumphs and challenges of working with families, carers, and support workers
Megan Borlase	Foundations Care
Megan Borlase	Lojic Institute
Megan Borlase	Quantitative review of the application of ABA in dementia care
Laura Seal	Detection of pest fish with dogs
Celia Lie	Art, mood, and consequences: Effects of colouring on mood and sensitivity to reward and punishment
